Advance Programming  
CS50

### 2010 - 2020

General Study  
The Royal School of  
Science

## LANGUAGE

- English
- Urdu
- Indonesia

## PROFILE INFO

I'm M. Maaz, a Self-Taught Developer. I started learning about coding-related stuff when covid came back in 2019 in Pakistan.

My experience with React-Native extends to about a year and half.

## HOW I STARTED AS SELF-TAUGHT

I started with a course CS50 shared by my father.

I started with C. If you master C, (in my opinion) then you can learn any other programming language easily we just gonna need to learn the syntax of the programming language and some other additional concepts, etc...

I faced many distractions and obstacles on the internet world. But, I knew how to tackle it.

Currently, I'm learning and building mobile apps with React-Native.

I'm learning and building.

My future plans are about Entrepreneurship and startups.

## MY SKILLS & EXPERTISE

API Development **Advanced**

Express JS **Advanced**

HTML/CSS/JS **Advanced**

C Programming **Advanced**

React-Native **Intermediate**

DSA **Intermediate**

## CERTIFICATE - CS50X
